Full Stack Web Development, RDL Technologies Pvt Ltd | Mangalore | 8/2023 - 9/2023

PROJECTS

3S HumaNova, HRMS Platform (2025)

- Tested a Human Resource Management System (HRMS) similar to Keka, covering modules like Administration, Workforce, Department, Job Role, Leave Policy, and Work Plan.
- Performed end-to-end functional testing for user roles (Tenant Admin, Employee, Super Admin, Department Manager).
- Validated Clock-In/Clock-Out and attendance tracking workflows.
- Conducted API testing for employee, attendance, and leave management using Postman.
- Executed manual and automation test cases, participated in regression cycles, and verified data consistency in MySQL.
- Technologies Tested: React, REST APIs, Postman, MySQL, Jira, Chrome DevTools.

MaisonQR, Web Application (2025)

- Tested a change request management system for fashion retail operations.
- Validated UI enhancements and feature upgrades in the admin dashboard.
- Performed functional and integration testing to ensure seamless data flow between components.
- Reported and tracked issues through Jira, collaborating with developers for quick resolutions.

- Contributed to improving deployment readiness and product stability before release.
- Technologies Tested: React, JavaScript, Next.js, Tailwind CSS, REST APIs, Jira, Postman.

Hotmess, Web & Mobile Application (2024)

- Tested a fashion e-commerce platform with full client-side and admin-side functionalities.
- Verified features like authentication, gift card system, editorial section, user profiles, ChatBot, and search functionality.
- Performed UI, functional, and regression testing on both web and mobile (React & React Native).
- Validated REST API integrations for product, order, and user modules using Postman.
- Ensured cross-browser and cross-device compatibility, improving overall user experience quality.
- Technologies Tested: React, React Native, Next.js, JavaScript, Tailwind CSS, Redux, REST APIs, Postman, Chrome DevTools.

Emotion Recognition of Elderly People using Deep Learning

- Tech Stack: Python, CSS, JS, XML, Java
- Project is designed to track a person's emotional state, likely using facial recognition analysis.
